About Harf

About Harf

Harf was established 25 years ago and has developed throughout these years in line with the development of computer technology, keeping pace with the latest updates in the field of programming, internet, solutions, and systems. Therefore, it has become one of the major companies in this field in the Middle East. Harf's activities have developed and extended to cover the fields of e-learning systems, development of educational and training courses, translation from Arabic into a variety of languages and vice versa, production of software and Arabic and Islamic applications, websites, and e-publishing of paper books .

Mission

To harness information technology in serving the user in different parts of the world using vital scientific and practical products and projects.

03
Objectives

Objectives

01

To publish culture, human knowledge, and certified and approved information, which fulfill the needs of its different clients

02

To form Islamic cultural and informational unity that contributes to the spread of the desired positive awareness among the Islamic peoples. This is implemented through efforts to spread the company’s products in the global markets in different languages

03

To strive to achieve the highest standards of quality, efficiency, and rapid production

04

To make the Islamic sources available in an electronic form by means of programs and the internet, and in a modern style that fits today’s era and keeps pace with the rapid global scientific and technological revolutions taking place day by day

05

To ensure that our publications do not violate the well-established Islamic rules. This is implemented by presenting them to major religious and jurisprudential bodies in order for them to be reviewed and approved

04
